PROFESSIONAL SUMMARY

With years of experience in data analysis, I excel in working with diverse data sources and transforming complex datasets into actionable insights that support informed decision-making. My strong problem-solving skills, keen attention to detail, and polished presentation abilities have been refined through my work as a data analyst with various clients. I am proficient in statistical analysis, data mining, and visualization techniques, which allow me to uncover valuable insights and identify trends. Additionally, I am skilled in developing predictive models to enhance business strategies and decision-making processes. My extensive experience in data analysis is complemented by a solid educational background. I am adept with statistical and data analytics tools such as Excel, SQL, and Power BI. Specializing in leveraging data insights for business decisions, I am also proficient in Microsoft Office and data manipulation, which enhances my ability to provide valuable analytical solutions. As a dedicated and detail-oriented analyst, I am ready to contribute to the success of dynamic organizations in this multifaceted role.

SKILLS

Excel: Lookups, Complex formula, Pivot Tables, Power Query, VBA and Macros, What-if (Goal seek, Solver, Scenario Manager)
SQL: DDL, DML, DQL, DCL, Window functions
Power BI: Power Query, DAX, Data Modelling, Reports, Dashboards, Source connection and Transformation and Tableau Desktop
Data Cleaning, Modelling, Analysis, Transformation, Visualization, Statistics, Predictive Analytics.
Business & Process Skills: Re-Engineering | Process Improvement | Stakeholder Management | Requirements Engineering | AS-IS | TO-BE | Gap Analysis | Document Design | Workshop Facilitation | Root Cause Analysis | Process Flow Mapping | Project Scoping | Full Project Lifecycle | Target Operating Model | Business Operating Model | SDLC | MoSCoW | User stories | Acceptance Criteria| Use case | Business Requirement Document | RAIDS log.
Tools: Jira | Confluence | MS Project | Visio | PowerPoint | Excel | Word | SharePoint
Process & Methodologies: Agile | Waterfall | Unified Modelling Language (UML) | Customer Journey Definitions

EXPERIENCE

Data Analyst **2026 – Present**

TechDrive Limited, UK

- Fetch data from SQL Server, Azure, and other sources, applied ETL skills to structured and unstructured data using power query editor, created data models and visualizations to answer business questions.
- Prepare insightful dashboards and reports from complex datasets to make informed decisions and recommendations to management teams writing DAX functions and using visualization charts in Power BI.
- Integrated ETL of structured and unstructured data into Power Query, cleaned data and applied DAX functions.
- Led 10 data extraction, warehousing, and analytics initiatives that reduced operating costs by 20% and created customized programming options.
- Use DDL and DML queries in SQL Server to write 6 complex scripts that increased the volume and query accuracy automation by 94%
- Lead 5 data extraction, warehousing, and analytics initiatives to reduce operating costs by 20% and create customized programming options.
- Migrate 3 reports weekly from SQL into Power BI, tested for accuracy and quality before publication.
- Support the capacity building activities of staff by sharing watch me do it videos of BI tools.

- Directed a seamless data migration from on-premises to Azure-cloud platform using a hybrid of Agile and Waterfall methodologies.
- Ensured GDPR compliance and implemented robust data security protocols during migration.
- Managed and aggregated data across multiple systems using SQL on the company's database, conducting detailed analyses to provide actionable insights for senior management.
- Improved decision-making efficiency by 25% through clear, concise presentations of complex data, enabling stakeholders to swiftly adjust strategies in implementing the data migration.
- Implemented data security measures to protect sensitive information, ensuring compliance with industry regulations during the data migration.

Tools and Skill: Excel, SQL, Power BI, Presentation, Team Leadership, Performance Management

Operations Analyst/ Project Manager **2024 - 2025**

Selah's Ventures Limited

- Monitored project progress by collecting, cleaning, and analyzing operational and financial data to track timelines, costs, and resource utilization.
- Coordinated with procurement, HSE, finance, and site teams to ensure timely data flow and alignment with project objectives.
- Assisted in contract administration by tracking vendor performance metrics, delivery timelines, and compliance using structured datasets.
- Ensured compliance with NLNG, NNPC, SEPLAT and industry regulatory requirements through accurate documentation, data validation, and audit ready reporting.
- Prepared weekly and monthly project status reports for internal stakeholders and NLNG-aligned partners, ensuring accuracy and compliance with reporting standards.
- Supported budget tracking by analyzing expenditure data, forecasting costs, and flagging variances against approved project budgets.
- Assisted in post-project reviews by analyzing performance data, documenting lessons learned, and supporting continuous improvement initiatives

Junior Support Data Analys **2023 - 2024**

Greenpeg Limited

- Completed tasks such as data acquisition, data processing, data integration, information reporting, automation of manual processes and some business process streamlining, achieving an increase in operational efficiency by 20%.
- Ensured data integrity, data security and accuracy through rigorous data cleaning, validation and transformation processes, enhancing trust in analytical outputs and resulting in a 18% reduction in data-related errors.
- Built and optimized data pipelines, enhancing data processing efficiency by 15%.
- Implemented data quality checks and ensured data integrity, adhering to data governance standards and policies.
- Utilized SQL to design and execute queries on client data within the company's enterprise software products, improving data retrieval speed by 30%.
- Conducted performance tuning and optimization of SQL queries and data access patterns to improve system efficiency

EDUCATION & QUALIFICATIONS

MSc Computer Science
University of Hertfordshire, Hatfield

B.A Philosophy
Obafemi Awolowo University, Ile-Ife

CERTIFICATIONS

Full Stack Data Analytics Bootcamp
LG Data School

Intermediate SQL
DataCamp

Strategies for Personal Growth and Development
Young African Leaders Initiative Network

Google Digital Skills for Africa
